

Haven Eco-tour

6A Albert Li

Are you looking for a short natural adventure? Are you aged 10-18? Then there is the perfect tour for you! On this two week tour, you can live closer to nature. You can help the farmers in the organic farm, plant trees and clean the beach.

You can learn to do organic farming so that you can learn to use food waste to grow the plants and vegetables and use less chemical in food production.

I love planting trees. I know that trees can help improve the air quality. And I also help clean up the beach since it can reduce rubbish and the sea animals can suffer less from water pollution.
