My study at school

Yesterday, my teacher told us to prepare for the examination. He told us to pay attention in class. Also, he asked us to form study groups to help each other.

I studied hard after school. I stayed up at night so I felt tired in class. I could not stay awake to learn.

My teacher tells me that my English is poor. I have to set a timetable for my study in order to improve my English and the other subjects. I hope this timetable can help.
