My study at school

Yesterday, the teacher told us to prepare for the examination. We should pay attention and study hard. We should not be lazy.

I studies at recess at the covered playground with my friends. Studying together helps each other and keeps our friendship.

After school, I reviewed at home. I studied from the afternoon to the night. I did not have dinner. I felt hungry and tired. My family was very worried about me.

This morning, I was late for school. My teacher punished me. I felt sleepy and sad.

I learned in this event that we ought not to stay up late at night. We should go to bed early. We should have a time schedule for study.
